powerful scalable **intuitive**

The C-Series multiroom system offers advanced features that make enjoying your musical experience even easier. Party Mode allows you to control the music and volume in every room from one room using a shared source. Source Linking connects multiple rooms to the same source while allowing independent volume and on/off control. This allows you to have your music follow you throughout your home. Zone Linking provides control of multiple rooms by one or more keypads, perfect for open concept homes.

get **connected**

The C-Series System is designed for integration, with Home Theater triggers, routed and common IR outputs, 12VDC trigger outputs, an optional system wide paging capability for intercom and telephone systems, and an RS-232 port for connection to home integration systems.

time to **play**

Featuring a system wide clock with alarm and sleep timer functions for individual rooms, the C-Series System can provide the time, wake you to music, and help you delay your day, all with your favorite music.

affordable excellence

Music anywhere you want it, at the touch of a button. That's what you'll get with the Russound CAA66 Controller Amplifier. Classical music in the bedroom, rock in the den, and salsa in the kitchen. A multiroom system for everyone to enjoy.

elegant and easy

The CAA keypads deliver elegant access that's easy to use. Directly select sources: adjust volume, bass, treble, balance and volume whenever you want it. Add an optional KPSC for transport and numeric control of your sources from the keypad. Link multiple controllers together for an increased number of rooms, or add up to three keypads per zone for total convenience.

complete control

To make your multiroom system even more convenient to use, Russound offers a sleek, ergonomic remote control. Easy to operate and packed with useful features, the remote provides an added level of access to your music.

system expandability

From hubs and controllers to amplified keypads, an A-BUS system installs using CAT-5 cable and keypads fit into standard low voltage workboxes. Installation, whether in new construction or an existing home, is a snap. The modular design of A-BUS components makes future system expansion painless. Add additional A-BUS hubs or controllers to increase the number of system rooms.

BTA-1 A-BUS *Bluetooth*® Module

The BTA-1 A-BUS *Bluetooth* receiver integrates with Russound A-BUS multiroom systems, which are also interconnected using standard CAT-5 cable. The A-BUS *Bluetooth* receiver streams content to the local A-BUS keypad, so it serves as a local source within the room whose audio that particular keypad controls.

be resourceful

Digital music, Internet radio and iTunes are all available through Russound's Smart Sources. Our Digital Media Streamer and iBridge Dock both increase the accessibility to digital music available on iPods® local network devices or the internet available for listening through though our multiroom audio systems.

stay connected

Russound Smart Sources deliver metadata about the song, station, artist, album, or playlist of what's being played to specific Russound keypads and touch-screens, allowing you to check out the name of the artist you liked on your favorite internet radio station or see what playlist your children are listening to.

navigate your favorites

Russound Smart Sources make it easy to select your favorite stations, albums, artists or genres from your system keypads and touch-screens. Click or scroll through your sources and select anything you want to hear wherever you want to hear it.

BSK-1 *Bluetooth*® Source Kit

The new BSK-1 C-Series *Bluetooth* Receiver permits *Bluetooth* enabled devices to stream content to C-Series systems for wireless audio. It is a remotely located *Bluetooth* receiver, optimized for ideal placement and range by the custom installer. For maximum flexibility it can be configured as either a system source or a local source.

The BSK-1 integrates with Russound C-Series multizone systems. System components communicate with each other via the Russound RNET protocol, and components are interconnected using standard CAT-5 cable.

Flexbox Back Boxes

Flexbox speaker back boxes reduce background noise, provide a moisture barrier, diffuse distortion and improve sound quality. The flexible construction allows for easy installation in retrofit or new construction settings. Both models are flame retardant and meet ASTM E119 and UL 263/ NFPA 251 (1-hour) and ASTM E84/NFPA 70 standards.

power for your music

Audio amplifiers are the muscle behind every home music system. Russound puts great pride and effort into building stereo and multizone amplifiers that supply years of problem-free service.

Russound engineers embarked on designing our amplifiers to meet the demands of multizone audio systems: seamless integration, bulletproof reliability and astonishing fidelity. Built to complement an extensive array of audio systems, these versatile products deliver outstanding performance under the most demanding conditions.

R-Series power amplifiers

The R-Series amplifiers feature an elegantly understated industrial design. Their standard-width, modular-height designs look great in system shelving or built-in units, with rack mount conversion hardware for seamless rack integration.

Russound's R-Series amplifiers employ a robust circuit design for stability under demanding loads. All models feature auto signal-sensing inputs and bridgeable channel pairs for increased power output and flexibility of application. All amplifier channels feature independent gain controls for precise level matching and dual speaker outputs for convenience.

X-Series power amplifiers

The X-Series amplifiers are dual-source capable and are built to support installations using multiple speakers and volume controls. They are also well-suited for two-channel applications where higher power is needed, such as outdoor zones or large open interior spaces.

Russound's X-Series line of two-channel stereo amplifiers delivers performance and features in a flexible package. Featuring signal-sensing inputs, front mounted volume and balance controls, bridgeable outputs, and A/B speaker switching, the X-Series makes dual source amplification easy and affordable.

Signal sensing inputs allow the X-Series amplifiers to easily integrate with multizone audio systems and home theater components, or wherever local source amplification is being added to an existing system. In addition to front mounted volume knobs, all X-Series models can be used with impedance matching volume controls to power multiple pairs of speakers, or numerous zones.

D250LS 2-Channel Digital Amplifier

Auto-sensing enables localized speaker override for a connected peripheral, such as a TV or PC. The bridgeable power setting combines channel power for 125W into a single 8-ohm load, rated 50W/channel RMS at 8 ohms. 1U 1/2 rack chassis has three mounting options.

R850MC 4 Zone/8 Channel Multiroom Amplifier

Protection circuitry provides safety and reliability under heavy use. Amplifies up to four stereo line-level sources. Zones have dedicated line level inputs or can share a source via the bus input. Separate gain controls for each zone to preset room sound levels. Zone output can be switched to stereo or bridge mono output. In bridged mode, a zone's left and right channels are combined for a higher-power mono output, ideal for large rooms or outdoor listening areas. Rack ears included. 50W/channel RMS at 8 ohms or 75W/channel RMS at 4 ohms x 8. Each zone can be bridged providing 150W at 8 ohms.

Russound wrote the book on impedance-matching volume controls and is widely regarded as the industry leader in auto-former technology. All Russound volume controls feature a superior auto-former design with impedance matching to provide excellent frequency response and maximum power transfer. With our volume controls, you get the highest possible performance, reliability and longevity.

126W Volume Controls

the music lover's intercom

A natural extension of Russound's audio systems, ComPoint is a complete intercom solution that integrates with virtually any multiroom home audio system.

ComPoint is a true intercom system, providing point-to-point (zone-to-zone) communications as well as global paging from any keypad. With ComPoint, you can enjoy the benefits of multiroom audio and the convenience of intercom communications, all easily integrated together.

Instead of producing tinny sounds from an embedded intercom speaker, ComPoint can take advantage of existing in-wall or in-ceiling speakers that are part of a multiroom audio system, so you don't have to sacrifice sound quality for home communications and security.

Additional features that make ComPoint highly desirable are selectable doorbell chimes and "do not disturb" and "listen" mode features. For added convenience, you can respond to messages hands-free with point-to-point intercom, giving you the freedom to do other things and still converse using ComPoint.
